

biblingo

An Interactive App To Make The
Biblical Language & Culture Easy To Learn!

About The Client

Analyzing the decline in Bible reading and biblical literacy in today's culture, Kevin Grasso, a passionate linguist, and Bible translator envisioned Biblingo with an aim to advance God's Word in the world. He realized, making the biblical languages more accessible and easier to learn, would help spread knowledge of God's word. Biblingo's mission lies in helping laborers of all kinds master the culture and languages of the Bible, in order to aid them in transforming our world.

Their Stumbling Block

Learning biblical languages is daunting and frustrating. With the lack of solid resources to learn the biblical languages, it is difficult to grasp or actively use them in day to day life. Students often spent hours together on Greek and Hebrew only to make little progress in originally using the languages in perfect understanding.

Bible translators and teachers who engage in spreading the knowledge of God's word needs to know more than just the English translation of the biblical words. They need to understand the culture in which the words are used to stay faithful to the original. Reading through huge journals, and matching them with concepts took a longer time to learn, and proved stressful for the students. The Biblingo team wanted to simplify this learning process by leveraging the advances in technology.

Fingent's Approach

Fingent understood the complexities involved in learning biblical languages like Greek and Hebrew. With previous experiences in creating intuitive learning solutions for leaders in the educational sector, Fingent realized what the team required here was a customized platform that could enable fun, interactive, engaging, and immersive learning. Utilizing the expertise and latest in custom software development, Fingent helped build an interactive learning app, Biblingo.

Biblingo uses proven second language acquisition techniques, and modern language studies to help students internalize the languages from day one. With interactive exercises and intuitive visuals, Biblingo enables quick, effective, and convenient ways to learn the biblical languages.

Features Of The Application

User/Student Side:

Users can choose the application subscription plan as per the languages they want to learn, ie., Greek, Hebrew, or Greek & Hebrew. On selecting the desired language, the users or students get access to the learning side of the app which is segmented into three major modules:

In this section, Biblingo uses images, audios, videos, along with a rich vocabulary to culturally reconstruct the Bible. This helps the students to understand the cultural context of the languages.

The app features different pronunciation types for students to choose from. For Greek, there are 4 different pronunciation types and for Hebrew, there are 2 pronunciation types. Based on the pronunciation type selected by the student user on "my profile" page the audio files will be customized.

Students also get the privilege to ask questions and clarify doubts from teachers or admins to attain enhanced clarity.

To further help the students, the segment includes an active grammar section to enable students, intuitively learn how words work together to form meaningful sentences.

An effective set of practice drills are featured to improve the recognizing, reading, and writing skills of the students.

Language Learning

Bible Reading

In this segment, Biblingo features a list of senses of words to help read and understand the Bible verses better.

Users get the facility to search verses or senses using English gloss or Greek or Hebrew words. They also get the option to vote for the senses that are most apt for the selected words in the bible context.

To further improve the Bible reading this module also features custom graded texts in the Bible chapters based on the user's vocabulary, and learning. With a built-in dictionary, users get more clarity of words while reading the Bible.

The custom deck feature allows users to create their own customized vocabulary decks by storing words of their choice.

Students also get the option to archive learned words from the Bible Index.

Flashcard Deck

The app features many study tools like FlashCards, Dictionary, and Vocabulary to help students learn words and phrases better, which can be accessed separately through this segment of the platform.

Students can learn from the preset decks created by the admins, which includes the basic alphabets and additional vocabulary to enable enhanced learning.

Using the spaced repetition algorithm, the app facilitates iterative learning that helps users focus on words that need more practice.

Students also get the facility to practice the custom decks created by them from the bible reading texts.

Admin/Teacher Side:

..... The admins get the option to create preset decks by uploading vocabulary and dictionary to the app through xml files.

..... The admins can also upload images, audios, and videos required for immersive learning.

..... The platform provides a detailed list of students using the app, through which the admins get the facility to manage the app users.

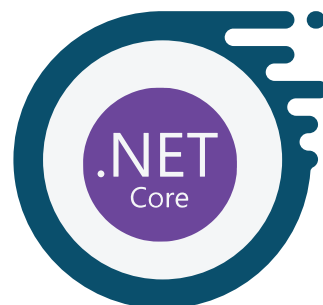

..... Teachers using the admin side of the app get the option to create classrooms using a valid ID number. Students linked to the particular class ID get the facility to interact with the teachers through Q&A.

..... Admins also help students better learn by answering their queries.

End Results

Biblingo is built keeping the learning requirements of students, teachers, pastors, translators, and Bible-lovers in mind. Executing an immersive and interactive approach, Biblingo helps learn the biblical languages in a fun and engaging manner.

Previously students found it very complicated and stressful to learn biblical languages like Greek and Hebrew. They spend hours listing out the grammatical elements to recognize their English translation and true meaning. With Biblingo, learners get the opportunity to actively use the biblical languages with relative images, audios, videos, and flashcards. The app enabling intuitive learning helps students to quickly recognize literary patterns, grammatical structures, and senses of words. Enabling to retain what they have learned, Biblingo facilitates a progressive and faster learning process.

Biblingo helps students quickly advance in learning the biblical languages as well as, understand and imbibe the culture of the bible. With simple to use features, Biblingo is an effective learning app for schools, organizations, families, and individuals who enjoy and think can benefit from learning the biblical languages.

About Fingent

We are a Global IT company providing strategic IT business solutions and services for complex business problems, in multiple industry sectors including retail, healthcare, finance, education, and more. Our vast technology and industry expertise enable us to focus on cutting-edge internet technologies with the aim to develop scalable, secure, and easy-to-use web applications that work across multiple devices. We believe that the judicious use of technology, together with a good design can reduce complexity, connect individuals, and provide valuable insights, all of which ultimately help businesses succeed.
